### FIELD OF STUDY: <u>DIETETICS</u> LIST OF SUBJECTS FOR <u>2025/2026</u>

No.	SUBJECT	HOURS/ ECTS	Form of passing	
Winter Semester				
02-DT-1-ER-07	Basics of Dietetics (Podstawy Dietetyki)	15/4	Exam/raports	
01-WF-1-ER-15	Clinical Nutrition (Żywienie Kliniczne)	20/5	Exam/raports	
02-DT-1-ER-03	General and Nutritional Biochemistry (Biochemia Ogólna i Żywności)	15/4	Exam	
02-DT-1-ER-01	Sports Dietetics and Supplementation (Dietetyka Sportowa i Suplementacja)	20/5	Exam	
02-DT-1-ER-11	Histology of the Digestive System (Histologia Układu Pokarmowego)	15/4	Pass	
01-WF-1-ER-08	Nutrition in the Life Cycle (Żywienie w Różnych Okresach Życia)	20/5	Exam/raports	
01-WF-1-ER-26	Microbiology in Human Nutrition (Mikrobiologia w Żywieniu Człowieka)	30/6	Exam/raports	
01-T-1-ER-11	Allowed and Prohibited Methods of Performance Support In Sport (Dozwolone i Zabronione Metody Wspomagania Wysiłku w Sporcie)	20/5	Exam/raports	
01-T-1-ER-12	Immunodietetics (Immunodietetyka)	20/5	Exam/raports	
01-T-1-ER-13	Nutrition in the prevention and treatment of obesity (Żywienie w zapobieganiu i leczeniu otyłości)	20/5	Exam/raports	
01-WF-1-ER-27	Basics of Health Training (Podstawy Treningu Zdrowotnego)	15/4	Pass	
01-WF-1-ER-28	Anthropomotorics (Antropomotoryka)	15/4	Pass	
	Summer semester			
02-DT-1-ER-09	Vegetarian Diet in the Prevention and Treatment of Diseases (Dieta Wegetariańska w Profilaktyce i Leczeniu Chorób)	15/4	Pass	
02-DT-1-ER-04	Sports Nutrition (Żywienie w Sporcie)	15/4	Pass	
02-DT-1-ER-10	Food and Waterborne Parasitology (Parazytologia w Żywieniu)	15/4	Pass	
01-WF-1-ER-16	Nutrition in Extreme Sports, Qualified Tourism and Different Climatic Conditions (Żywienie w Sportach Ekstremalnych, Turystyce Kwalifikowanej i Różnych Warunkach Klimatycznych)	20/5	Exam/raports	

01-WF-1-ER-17	Methodological and Ethical Aspects of Conducting Human Studies (Metodologiczne i Etyczne Zagadnienia w Badaniach z Udziałem Ludzi)	10/2	Project
01-WF-1-ER-18	World Cuisines (Kuchnie Świata)	15/4	Pass
01-WF-1-ER-19	Nutritional Support for Fertility and Reproductive Health (Żywieniowe Wspomaganie Płodności i Zdrowia Prokreacyjnego)	15/4	Exam/raports
02-DT-1-ER-08	Comprehensive Nutritional Evaluation and Body Composition Analysis (Kompleksowa Ocena Stanu Odżywienia i Składu Ciała)	15/4	Pass
02-DT-1-ER-20	Prevention and Treatment of Diet Related Chronic Diseases (Profilaktyka i Leczenie Chorób Dietozależnych)	15/4	Exam

#### **OBLIGATIONS**

#### **Classes for ERASMUS Incoming Students**

All Incoming Students are obliged to respect the following rules:

- Students should establish/update the list of classes/lectures to attend (learning agreements) as soon as possible (within one month of their arrival to Poznań).
   Student must not make changes in this document during the semester or shortly before the exams because it is the basis for preparation of an Exam Card.
- Student must not stop attending classes/lectures during the course. Institutional and Departmental Coordinator and teacher responsible for it should be informed earlier.
- 3. Students should come to classes run by Polish teachers on time.
- Within every chosen course an Erasmus Student has the maximum of 15 class-hours of lectures (in English) and, besides that, participates in some practical classes together with the Polish students. We offer a module of subjects in English with our academic teachers who are responsible for the subject and are obliged to do their best to help students. The module is based on proposals from incoming students (their Learning Agreements). Whether a course will be offered in English is subject to student demand (min. 50% of incoming students). For financial reasons we can offer a MAXIMUM of 10 subjects per semester from each faculty and 5 subject for physiotherapy students (no more).
- The teacher enters points for Erasmus student courses into the USOS system, to which the student has access. The Transcript of Records which will be sent directly to the coordinator at the partner institution not earlier than one month after the end of semester.

5.

- In case of any problems an Erasmus Student should immediately contact his/her Polish partner-student, the Institutional or Departmental Coordinator.
- According to the Bilateral Agreement signed with your university, the IRO will confirm the real time of your study only.

Cultura	PODSTAWY DIETETYKI
Subject	BASICS OF DIETETICS
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Paulina Nowaczyk, PhD
ECTS points	4
Number of hours	15
Methods of estimation	Exam/raports
Effects/results of education	This course provides students with a basic knowledge and practical skills in diet planning for health prophylaxis in various population groups, as well as basics in nutritional support and treatment of selected health conditions.  The aims of the course are: familiarizing students with the basic rules of estimating energy-, macronutrients-, vitamins- and minerals requirements in various population groups, familiarizing students with the basic rules of diet planning and evaluation for various population groups, familiarizing students with basics of etiopathology, risk factors and nutritional treatment in selected health conditions and diseases.
Topics of the classes	<ol> <li>Estimating energy and macronutrients needs for various population groups. Nutritional recommendations on vitamins and minerals intake in various population groups – various levels of dietary guidelines.</li> <li>Basic rules of diet planning and evaluation.</li> <li>Diet planning in prevention of diet-related diseases in various population groups.</li> <li>Diet planning in prevention and treatment of overweight and obesity.</li> <li>Diet planning in prevention and treatment carbohydrate metabolism disorders.</li> <li>Diet planning in prevention and treatment lipid metabolism disorders.</li> </ol>
Recommended literature	<ol> <li>Gandy J. Manual of Dietetic Practice. 6th Edition. Athenaeum Uitgeverij 2019.</li> <li>Webster-Gandy J., Madden A., Holdsworth M. Cubicat	ŻYWIENIE KLINICZNE			
Subject	CLINICAL NUTRITION			
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej			
Teacher's name	Krzysztof Durkalec-Michalski, Ass. Prof.			
ECTS points	5			
Number of hours	20			
Methods of estimation	Exam/raports			
Effects/results of education	This course provides students with the detailed knowledge and practical skills in the field of nutritional prophylaxis and treatment of selected health conditions and diseases.  The aims of the course are:  - familiarizing students with etiopathology, risk factors, treatment methods – with special emphasis of nutrition, in selected diseases,  - gaining the ability of nutritional education and rationalization of nutrition in selected health conditions,  - gaining the abilities of practical implementation of diet planning in selected diseases and health conditions.			
Topics of the classes	<ol> <li>Nutrition and diet planning in hypertension and selected components of metabolic syndrome.</li> <li>Nutrition in prophylaxis and treatment of osteoporosis and skeletal disorders.</li> <li>Nutritional considerations for injury prevention and recovery.</li> <li>Nutrition in selected neurological diseases - Alzheimer's disease, Parkinson's disease, multiple sclerosis, lateral sclerosis, strokes, brain aging, epilepsy.</li> <li>Nutrition in selected autoimmune and inflammatory diseases - rheumatoid arthritis, psoriasis, alopecia areata.</li> <li>Nutrition in prophylaxis, treatment and recovery in various types of cancer.</li> </ol>			
Recommended literature	<ol> <li>Katz D., Levitt J., Essel KF., Yeh M-Ch., Summer R., Friedman C. Nutrition in Clinical Practice. 	BIOCHEMIA OGÓLNA I ŻYWNOŚCI		
Subject	GENERAL AND NUTRITIONAL BIOCHEMISTRY		
Unit of AWF	i Biochemii		
Teacher's name			
ECTS points	4		
Number of hours	15		
Methods of estimation	Exam		
Effects/results of education	To familiarize the students knowledge of the biochemical aspects of the structure and function of cells.  Mastering the students knowledge on essential metabolic processes in the human body.  Teach the students a thorough look at the biochemical effects provided dietary nutrients, particularly with regard to the specific person, the nature of work and the possible interactions of nutrition.  Acquaint the student with nutritional elements, particularly wit sports supplements, which may affect on physical performance of athletes.		
Topics of the classes	An introduction to the subject. Essential minerals in human body. Food sources of essential minerals. The pH scale and the p values of biological fluids. Determination of some essential minerals in human blood. 3 hours  Amino acids, proteins. Metabolism of amino acids in rest and during the exercise. Determination of albumin, total protein ammonia concentrations in the blood. 3 hours  Carbohydrates. Aerobic metabolism of glucose. The role of glycogen. The structure and food sources of carbohydrates. The taste of some of simple sugars and polysaccharides. 2 hours  Anaerobic pathways to resynthesize ATP. The role of lact acid/lactate in athlete's organism. Some eliminations methods of lactate after exercise. Determination of lactate concentration in the blood. 2 hours  Lipids. Structure, types, food sources, influence on human health Metabolism of lipids and cholesterol. Determination of total cholesterol concentrations in the blood. 2 hours		

Biochemical aspects of sports supplements.

	Demonstration of the most popular supplements in the market. 2 hours		
	Summary of General and Nutritional Biochemistry. A written test. 1 hour		
Literature	Mathews CK, van Holde KE, Ahern KG. Biochemistry. Addison Wesley Longman, Inc. 2000. Maughan RJ, Gleeson M. The Biochemical Basis of Sports Performance. Oxford University Press. 2010. MacLaren D. Nutrition and Sport. Elsevier. 2007. Hargreaves M. Exercise Metabolism. Human Kinetics. 1995. Cultinat	DIETETYKA SPORTOWA I SUPLEMENTACJA		
Subject	SPORTS DIETETICS AND SUPPLEMENTATION		
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej		
Teacher's name	Krzysztof Durkalec-Michalski, Ass. Prof.		
ECTS points	5		
Number of hours	20		
Methods of estimation	Exam		
Effects/results of education	This course provides students with the detailed knowledge and practical skills in the field of nutritional and supplementary support for exercise performance and physical capacity enhancement, body composition regulation:  1. Understanding and applying the detailed aspects of sports dietetics and supplementation.  2. Understanding the role of energy balance and availability, nutrients and fluids intake, and possibilities of their regulation in the diet of athletes in various sport disciplines.  3. Recognizing and implementation of evidence-based nutritional strategies to support athletic training and exercise performance.  4. Understanding of the practice and science background and when to refer out to other experts.		
Topics of the classes	<ol> <li>Diet planning, practical use of recommendation for nutrients intake, energy balance and RDA in sport practices.</li> <li>Diet management in strength sports.</li> <li>Diet management in endurance disciplines.</li> <li>Diet management in mixed sports disciplines.</li> <li>Supplementation in sport.</li> <li>Substances and methods which are permitted, prohibited or banned in sport.</li> </ol>

Subject -	HISTOLOGIA UKŁADU POKARMOWEGO		
	HISTOLOGY OF THE DIGESTIVE SYSTEM		
Unit of AWF	Department of Biology and Anatomy/Zakład Biologii i Anatomii		
Teacher's name	Wojciech Jarosz, PhD		
ECTS points	4		
Number of hours	15		
Methods of estimation	Pass (The test with some multiple choice, and matching)		
Effects/results of education	This course provides students with the detailed knowledge in the field of human histology focused on the digestive system.  At the end of the course student will be able to:  1. Describe the microscopic structure of human tissues –their morphological differentiation in relation to the function and location.  2. Describe the possibility of regeneration of individual tissues.  3. Describe the role of different types of tissues in structural and functional integrity of human body especially in relation to the role of digestive system.		
Topics of the classes	<ol> <li>Introduction to histology, methods used in histology.</li> <li>Microscopy – practical operations on light microscope.</li> <li>The structure, functions and regeneration of different types of epithelial tissues. Types of intercellular connections.</li> <li>The structure, functions and regeneration of different types of connective tissues, specific structure and role of adipose tissue.</li> <li>Blood and lymph: characteristic of plasma and morphological elements: number and structure of erythrocytes – the role of hemoglobin in transport of oxygen, number and structure and functions of leucocytes (lymphocytes, monocytes and granulocytes), immunological role of lymphocytes, number structure and functions thrombocytes. The role of blood and lymph.</li> <li>The structure, functions and regeneration smooth, striated muscle, myocardial fibre</li> <li>The structure, functions and regeneration of nerves tissue in different part of nervous system; reflexes – conditioned and unconditioned, bisynaptic reflex arc.</li> <li>Detailed histology of selected parts of digestive system.</li> <li>During individual work with microscope in lab students will analyze the structure of selected human tissues and organ</li> </ol>

Cubicat	ŻYWIENIE W RÓŻNYCH OKRESACH ŻYCIA			
Subject	NUTRITION IN THE LIFE CYCLE			
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej			
Teacher's name	Paulina Nowaczyk, PhD			
ECTS points	5			
Number of hours	20			
Methods of estimation	Exam/raports			
Effects/results of education	This course provides students with a basic knowledge and practical skills in diet planning and management at different stages of life.  The aims of the course are to:  - have understanding on the major nutrition-related concerns at particular stages of life cycle,  - gain skills in nutritional status evaluation at different stages of life,  - get familiar with foods particularly useful in meeting nutritional needs at different stages of life,  - gain skills in dietary plans elaboration.  1. Nutritional recommendations for general population. Normal diet and its modifications. Overview of changes in nutritional needs throughout a life cycle. Basic rules of diet planning and evaluation.			
Topics of the classes	<ol> <li>Preconception nutrition and nutrition during pregnancy.</li> <li>Nutrition during the first year of life. Breastfeeding and nutritional needs of mother and of infant.</li> <li>Toddlers, preschoolers and school-aged children nutrition</li> <li>Adolescents and adults nutrition. Aging and changes in nutritional needs.</li> </ol>

Subject	MIKROBIOLOGIA W ŻYWIENIU CZŁOWIEKA		
Subject	MICROBIOLOGY IN HUMAN NUTRITION		
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej		
Teacher's name	Katarzyna Serwańska, Ass. Prof.		
ECTS points	6		
Number of hours	30		
Methods of estimation	Exam/raports		
Effects/results of education	Student defines differences between prokaryotic and eukaryotic organisms.  Characterizes the life requirements of microorganisms and selects appropriate methods for cultivating microorganisms. Student characterizes the diversity of microorganisms in their structure, metabolism, ecology and pathogenicity. Applies techniques to identify microorganisms and determine their number and degree of contamination of food, water, air and surfaces. Student characterizes the natural human microbiota and its relationship with health; explains the mechanisms determining the pathogenicity of microorganisms; understands and explains the essence of the action of antibiotics, disinfectants, preservatives and resistance to them, and performs analyzes in this area. Explains the possibilities of use of microorganisms by humans and the negative aspects of their occurrence in food. Student characterizes the microbiota of raw materials and food products. Student correctly interprets the results of microbiological tests. Applies the rules of occupational health and safety in the laboratory with biological hazards		
Topics of the classes	<ol> <li>Structure, morphological and anatomical diversity of prokaryotic microorganisms.</li> <li>Basic components of the culture medium. Culture techniques. Growth, propagation, cultivation and identification of microorganisms.</li> <li>Influence of physical and chemical factors on microorganisms. Sterilization, disinfection, maintenance (including alternative methods, essential oils and bacteriocins)</li> <li>Viruses, viroids and virusoids.</li> <li>Natural human microbiota and its impact on the functioning of the body.</li> <li>Saprophytic, pathogenic and toxinogenic microorganisms.</li> <li>Infectious diseases and poisoning of the digestive tract.</li> <li>Antibiotics and chemotherapeutics in food and treatment.</li> </ol>		
	Effects of abuse.  9. Microorganisms used in food production. Probiotics, Prebiotics		

and	CI.	ınh	IO	ricc

10. Undesirable microorganisms in food and their effects on human body.

Subject	DOZWOLONE I ZABRONIONE METODY WSPOMAGANIA WYSIŁKU W SPORCIE		
Subject	ALLOWED AND PROHIBITED METHODS OF ATHLETIC SUPPORT IN SPORT		
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej		
Teacher's name	Krzysztof Durkalec-Michalski, Ass. Prof.		
ECTS points	5		
Number of hours	20		
Methods of estimation	Exam/raports		
Effects/results of education	This course introduce students with international institutions involved in shaping regulations on substances and methods prohibited/allowed to use in sport, as well as provide them with an up-to-date knowledge of legitimate and safe substances/methods to support physical performance in sport:  1. Getting familiar with current and up-to-date lists of substances and methods prohibited in sport.  2. Acquiring the knowledge and practical skills of searching reliable information on substances and methods prohibited in sport.  3. Familiarizing with an adverse health consequences of using various types of prohibited substances and methods in sport.  4. Recognizing and implementation of evidence-based supplementation strategies to support athletic training and exercise performance.		
Topics of the classes	<ol> <li>Substances and methods prohibited to use in sport.</li> <li>Biomedical side-effects of doping in sport.</li> <li>Therapeutic Use Exemptions (TUEs).</li> <li>The most famous and discussed doping scandals in sport.</li> <li>Allowed pharmacological and supplementation support in sport.</li> </ol>

	IMMUNODIETETYKA
Subject	IMMUNODIETETICS
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Krzysztof Durkalec-Michalski, Ass. Prof.
ECTS points	5
Number of hours	20
Methods of estimation	Exam/raports
Effects/results of education	This course provides students with the theoretical foundations of the immunonutrition, including the knowledge of the impact of nutritional status, diet, and physical activity on functioning of immune system and body homeostasis.  1. Familiarizing with the possibilities to modulate the activity and potential of the immune system through interventions with specific nutrients and non-nutritive biologically active ingredients.  2. Understanding the impact of the alternated supply of nutrients on modifying the inflammatory or immune response of the body.
Topics of the classes	<ol> <li>Nutritional status &amp; nutrition and functioning of the immune system.</li> <li>'Immunosenescence' – 'aging' of the immune system.</li> <li>Immunological background of obesity and metabolic syndrome.</li> <li>An overview of supplements possessing an immunomodulatory effect.</li> <li>Nutrition in the prevention and treatment of upper respiratory tract infections.</li> <li>Exercise immunology. Immunonutrition in sport.</li> </ol>

Subject	PODSTAWY TRENINGU ZDROWOTNEGO
	BASICS OF HEALTH TRAINING
Unit of AWF	Department of Physical Activity Sciences and Health Promotion/ Zakład Nauk o Aktywności Fizycznej i Promocji Zdrowia
Teacher's name	Aneta Worska, MSc, Julia Ciążyńska, PhD,
ECTS points	4
Number of hours	15
Methods of estimation	Test of practical and theoretical skills Participating in the course actively
Effects/results of education	<ul> <li>Student is able to describe the essence and structure of health training, along with justification of the role of lifelong health training in human physical culture.</li> <li>Student is able to construct a health training implementation plan taking into account individual needs and specific conditions.</li> <li>Student accepts a positive attitude towards physical culture and appreciates the necessity of lifelong health training.</li> </ul>
Topics of the classes	- Health training - concept, meaning, place in physical culture. The concept of "health - related fitness" as the theoretical basis of physical fitness training in health training Health training - basics of creating physical activity programs for people of different ages and differentiated recommendations of physical activity levels. Measurement of physical fitness in preparation for planning and implementation of health training - Measuring physical activity in preparation for planning and implementing health coaching - Constructing and using health-related physical fitness standards (H-RF) - Designing programs (class handouts) of physical activity in health training targeting cardiorespiratory endurance - Designing programs (class handouts) of physical activity in health training aimed at flexibility - Designing programs (course handouts) of physical activity in health training focused on body mass and body composition - Designing programs (class handouts) of physical activity in health training targeting strength and muscular endurance
Recommended	Provided by a teacher.

19

Subject	ANTROPOMOTORYKA
	ANTHROPOMOTORICS
Unit of AWF	Department of Physical Activity Sciences and Health Promotion/ Zakład Nauk o Aktywności Fizycznej i Promocji Zdrowia
Teacher's name	Aneta Worska, MSc, Julia Ciążyńska, PhD,
ECTS points	4
Number of hours	15
Methods of estimation	Test of practical and theoretical skills Participating in the course actively
Effects/results of education	- Student knows and understands the essence and structure of health training, various methods of activity and physical training in relation to the age and health needs of the patient; - Student knows and understands aspects of the process of learning and teaching motor activities, the use of various forms of activity in teaching motor activities - Student is able to independently carry out the research necessary for the assessment of physical fitness and efficiency, and interpret the results of the research for use in activities that support the formation of health and physical fitness
Topics of the classes	-Human motoricity - basic concepts; Form, content and idea of movement; Classification of motoricity in terms of J.Raczek and J.SzopaEvaluation of the level of physical activity -Symmetry and asymmetry of human movements -Principles of test construction in the study of physical fitness of motor skillsAnalysis of the test "EUROFIT"- practical classes -Analysis of the "YMCA" test - practical classes -Human motor coordination - practical classes -Body flexibility - its determinants, measurement, training and meaningPhysical activity in optimization of body mass and composition, Strength abilities and the importance of resistance training
Recommended	Provided by a teacher.

literature

Subject	DIETA WEGETARIAŃSKA W PROFILAKTYCE I LECZENIU CHORÓB
	VEGETARIAN DIET IN THE PREVENTION AND TREATMENT OF DISEASES
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Małgorzata Mizgier, PhD Associate Professor
ECTS points	2
Number of hours	20
Methods of estimation	Pass

Upon completion of this course, students will be able to:

	1.	Understand the principles of vegetarian nutrition and the nutritional value of plant-based foods.
	2.	Identify and address potential nutritional deficiencies in vegetarian diets and learn strategies for their prevention.
Effects/results of education	3.	Apply knowledge of vegetarian nutrition to the prevention and management of diet-related diseases such as obesity, type 2 diabetes, hypertension, and cardiovascular diseases.
	4.	Design balanced, nutrient-dense vegetarian meal plans tailored to the dietary needs of various populations.
	5.	Demonstrate proficiency in preparing healthy and appealing vegetarian dishes while ensuring food safety and quality.
	6.	Evaluate and apply food preparation techniques that align with health-promoting dietary guidelines and lifestyle recommendations.

#### 1. Vegetarianism and the Variety of a Plant-Based Diet

Introduction to vegetarianism and the various types of plant-based diets, including ethical, environmental, and health motivations for adopting such diets.

#### 2. Vegetarian Diet and Disease Prevention

The role of vegetarian diets in preventing and managing chronic diseases such as cardiovascular diseases, diabetes, and obesity, with a focus on scientific evidence and practical applications.

#### 3.Non-Meat Sources of Nutrients

In-depth exploration of plant-based alternatives to meat, including sources of protein, essential fatty acids, vitamins, and minerals, and how to ensure a nutritionally balanced vegetarian diet.

#### **Topics of the classes**

#### 4. Vegetarian Dishes and Recipes

Practical exploration of vegetarian cooking, focusing on the preparation of a variety of nutritious, flavorful and culturally diverse vegetarian dishes and recipes.

#### 5.Food Preparation Techniques

Techniques and best practices for preparing vegetarian meals, including cooking methods, food safety standards, and the use of modern culinary tools and equipment.

#### 5.Planning a Healthy Vegetarian Diet

Developing practical skills in meal planning and creating vegetarian meal plans that meet nutritional needs for different population groups, with a focus on specific health conditions and dietary requirements.

Cukiaat	ŻYWIENIE W SPORCIE	
Subject	SPORTS NUTRITION	
Unit of AWF	Department of Food and Nutrition/Zakład Żywności i Żywienia	
Teacher's name	Joanna Karolkiewicz, Ass. Prof., Ewa Śliwicka, PhD.	
ECTS points	4	
Number of hours	15	
Methods of estimation	Pass	
Effects/results of education	<ol> <li>This course equips students with the comprehensive knowledge and skills which are essential in order to achieve sports nutritional and athletic performance goals:</li> <li>Understanding and applying the basic fundamentals of nutrition and sports nutrition.</li> <li>Identification and usage sound nutrition recommendations for macronutrient intakes among various athletes.</li> <li>Recognizing and implementation science based nutrition strategies to help athletes with their training and performance.</li> <li>Understanding of scope of practice and when to refer out to other experts.</li> </ol>	
Topics of the classes	<ol> <li>Energy balance and body composition in sports and exercise.</li> <li>Nutritional needs of endurance athletes</li> <li>Nutritional needs of strength/power athletes</li> <li>Hydration &amp; fluid replacement for athletes</li> <li>An overview of sports supplements.</li> </ol>

Subject –	PARAZYTOLOGIA W ŻYWIENIU
	FOOD AND WATERBORNE PARASITOLOGY
Unit of AWF	Department of Biology and Anatomy/Zakład Biologii i Anatomii
Teacher's name	Wojciech Jarosz, PhD
ECTS points	4
Number of hours	20
Methods of estimation	Pass (The test with some multiple choice, and matching)
Effects/results of education	This course provides students with the detailed knowledge in the field of parasitology with focus on food and waterborne parasites. At the end of the course student will be able to:  1. Describe the taxonomy, morphology, life cycle and symptomatology of water, soil and plant food transmitted parasites.  2. Describe the taxonomy, morphology, life cycle and symptomatology of meat transmitted parasites.  3. Describe most commonly used diagnostics procedures in parasitology.  4. Recognize parasites on microscopic slides.
Topics of the classes	<ol> <li>Introduction to Parasitology. Definition. Effects of the parasite on the host. Host reaction against the parasite.</li> <li>Main parasites transmitted by water, soil and plants. Relationship between fecal contamination, water and plant food. Species of parasites: Entamoeba histolytica, Giardia intestinalis, Cryptosporidium sp, Fasciola hepatica, Echinococcus sp, Enterobius vermicularis, Ascaris lumbricoides. Taxonomy. Morphology. Life cycle. Clinics.</li> <li>Epidemiology. Routes of contamination of food. Prevention and control</li> <li>Main parasites transmitted by meat and fish. Toxoplasma gondii, Taenia sp., Trichinella spiralis, Anisakis sp. Life cycle. Clinics. Epidemiology. Routes of contamination of food. Prevention and control.</li> <li>Zoonoses and zoonotic parasites of public concern. Toxocara canis and Toxocara cati. Taxonomy. Morphology. Life cycle. Clinics.</li> <li>Diagnostics in parasitology – practice class in laboratory.</li> </ol>

Subject -	ŻYWIENIE W SPORTACH EKSTREMALNYCH, TURYSTYCE KWALIFIKOWANEJ I RÓŻNYCH WARUNKACH KLIMATYCZNYCH
	NUTRITION IN EXTREME SPORTS, QUALIFIED TOURISM AND DIFFERENT CLIMATIC
Unit of AWF	Department of Sports Dietetics/Zakład Dietetyki Sportowej
Teacher's name	Krzysztof Durkalec-Michalski, Ass. Prof.
ECTS points	5
Number of hours	20
Methods of estimation	Exam/raports
	The course will provide students with knowledge about the basic
	concerns related to the nutrition in qualified tourism, agritourism
	and various climatic conditions. Active participation in the classes
	will:
Effects/results of	1. give the students understanding of health-related risks
education	associated with various forms of tourism;
	2. provide students with theoretical background and practical
	abilities to implement nutritional and supplementation strategies
	to reduce risks connected with various types of tourism, as well as
	to prevent and minimize its health-adverse effects.
	<ol> <li>Nutrition in hiking and polar tourism.</li> </ol>
	2. Planning nutrition in hypoxic conditions and high-mountain
	tourism.
Topics of the classes	<ol><li>Nutrition in water tourism and deep-sea diving.</li></ol>
	4. Nutrition management in tropical climate.
	5. Analysis of culinary tourism in Poland and selected locations
	in the world.
	6. Nutrition management during military missions and space
	flights.  1. Oktadiana H., Rahmanita M., Suprina R., Junyang P. Current
	Issues in Tourism, Gastronomy, and Tourist Destination
	Research. Taylor & Francis Ltd 2022.
	2. Long L.M. Culinary Tourism. The University Press of Kentucky
	2003.

	recommended by the teacher.

Subject	METODOLOGICZNE I ETYCZNE ZAGADNIENIA W BADANIACH Z UDZIAŁEM LUDZI
	METHODOLOGICAL AND ETHICAL ASPECTS OF CONDUCTING HUMAN STUDIES
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Paulina Nowaczyk, PhD
ECTS points	2
Number of hours	10
Methods of estimation	Project
Effects/results of education	This course provides students with theoretical introduction and basic practical skills in planning and conducting controlled human studies with special emphasis on dietary and supplementation studies in physically active individuals and athletes.  The aims of the course are familiarizing students with:  - theoretical background on planning and conducting human studies, e.g., types of study designs, rules and methods of study sample calculation and selection, tools for dietary evaluation, tools for physical capacity and performance evaluation, etc.  - bioethical standards in conducting human studies,  - registry databases for observational and interventional protocols.
Topics of the classes	<ol> <li>The strategy of epidemiological and interventional studies.</li> <li>Methods and tools in epidemiological research. Basic principles for designing epidemiological studies.</li> <li>Dietary assessment methods in epidemiological studies: strengths and limitations.</li> <li>Basics in evaluation of physical capacity and performance in human studies.</li> <li>Bioethical standards in conducting human studies.</li> </ol>
Recommended literature	<ol> <li>Willet W. Nutritional Epidemiology. Oxford University Press Inc, 2012.</li> <li>Thomas G. Research Methodology and Scientific Writing. Springer Nature Switzerland AG 2022.</li> <li>The Declaration of Helsinki.</li> <li>Oviedo Convention and its Protocols.</li> <li>Scientific papers published in high-impacted journals recommended by teacher.</li> </ol>

Subject	KUCHNIE ŚWIATA
	WORLD CUISINES
Unit of AWF	Department of Food and Nutrition /Zakład Żywności i Żywienia
Teacher's name	Agnieszka Bilska PhD., Natalia Popierz Rydlewska, PhD
ECTS points	4
Number of hours	15
Methods of estimation	Pass
Effects/results of education	<ol> <li>This course provides students with the detailed knowledge and practical skills about world cuisines.</li> <li>Possibilities of using plant and animal products in cooking.</li> <li>Technology of preparing and serving dishes and meals from cuisines of the world.</li> <li>Ability to select appropriate raw materials and apply appropriate technologies in the preparation of dishes and meals from world cuisines.</li> </ol>
Topics of the classes	<ol> <li>Specifics and specialties of selected cuisines of Asia.</li> <li>Practical familiarization with food preparation technologies characteristic of Mediterranean cuisine.</li> <li>Preparation of dishes characteristic of European cuisine.</li> </ol>
Recommended literature	<ol> <li>Grace O. Anti-Aging Dishes from Around the World, Skyhorse Publishing 2022.</li> <li>Katsuyoshi N. Subject	ŻYWIENIOWE WSPOMAGANIE PŁODNOŚCI I ZDROWIA PROKREACYJNEGO
	NUTRITIONAL SUPPORT FOR FERTILITY AND REPRODUCTIVE HEALTH
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Paulina Nowaczyk, PhD
ECTS points	4
Number of hours	15
Methods of estimation	Exam/raports
Effects/results of education	The aim of the course is to comprehensively familiarize students with lifestyle factors, including, above all, the role of diet, nutritional status and physical activity in shaping the reproductive health of females and males.  Within the course students will:  - learn about the role of nutritional deficiencies and excessive supply of energy and certain nutrients at various stages of ontogenetic development on nutritional status and health, and consequently on determination of the procreative potential of the organism,  - get the knowledge on the role of early metabolic programming and epigenetic mechanisms on reproductive health in future years,  - gain the practical ability to plan comprehensive nutritional and supplementation support for improvement of fertility and reproductive health for females and males during the preconception period, as well as for females during physiological pregnancy and with co-occurring diseases.
Topics of the classes	<ol> <li>Overweight &amp; obesity during various stages of life and their impact on reproductive health.</li> <li>The influence of nutrients, non-nutritive biologically active ingredients, supplementation and physical activity on the process of spermatogenesis and oogenesis.</li> <li>The role of nutrition &amp; nutritional status in functioning of hypothalamic-pituitary-ovarian axis.</li> <li>Nutritional support in endometriosis, polycystic ovarian syndrome, insulin resistance, thyroid diseases and hyperprolactinemia.</li> <li>Nutrition in pregnancy. Nutritional support treatment in selected pathologies during pregnancy i.e.,. gestational diabetes mellitus, hypertension, constipations and persistent vomiting.</li> </ol>

Subject -	KOMPLEKSOWA OCENA STANU ODŻYWIENIA I SKŁADU CIAŁA
	COMPREHENSIVE NUTRITIONAL EVALUATION AND BODY COMPOSITION ANALYSIS
Unit of AWF	Zakład Biologicznego Rozwoju Człowieka / Department of Human Biological Development
Teacher's name	Joanna Ratajczak, PhD Ewa Bryl, PhD
ECTS points	4
Number of hours	15
Methods of estimation	<ul> <li>participation in class activities</li> <li>confirmation of the ability to perform anthropometric measurements</li> <li>calculate anthropometric indices, and interpret the obtained results</li> </ul>
Effects/results of education	The student possesses knowledge of biochemical and questionnaire-based nutritional assessment, and anthropometric assessment of body composition.  The student possesses practical skills for conducting anthropometric measurements and can interpret the results using them for nutritional assessment purposes.
Topics of the classes	Introduction to Nutritional Assessment (4 hours) - Biochemical Assessments (Theoretical Discussion) - Dietary Questionnaires (Practical Exercises) Anthropometric Body Composition Assessment (4 hours) - Measurement Instruments - Anthropometric Measurements: Height and Body Mass, Waist and Hip Circumferences, Skinfold Thickness (Practical Exercises) - Calculation of Body Fat Percentage Based on Anthropometric Measurements - Anthropometric Indices in Nutritional Assessment and Calculating Energy Requirements (Practical Exercises) (3 hours) - Advanced Body Composition Assessment Methods – Practical Application of Bioelectrical Impedance Analysis (4 hours)

Subject	PROFILAKTYKA I LECZENIE CHORÓB DIETOZALEŻNYCH
	PREVENTION AND TREATMENT OF DIET RELATED CHRONIC DISEASES
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Małgorzata Mizgier, PhD
ECTS points	4
Number of hours	15
Methods of estimation	Exam
Effects/results of education	The course aims to learn about diet-related diseases, how to prevent and manage these diseases, and the state of the science on the linkages between dietary patterns and physical activity level and diet-related chronic diseases. The following dietary patterns will be discussed: Mediterranean diet, DASH (Dietary Approaches to Stop Hypertension diet), Vegetarian diet, Plant-based diets.
Topics of the classes	<ol> <li>Metabolic syndrome – management guidelines.</li> <li>Obesity</li> <li>Diabetes mellitus</li> <li>Cardiovascular diseases</li> <li>Osteoporosis</li> </ol>
