im. Eugeniusza Piaseckiego w Poznaniu

FACULTY OF HEALTH SCIENCES

The list of subjects for ERASMUS+ incoming students

TABLE OF CONTENTS:

Obligations	2
List of subjects for Physiotherapy	3-31
List of subjects for Dietetics	32-50

OBLIGATIONS FOR ERASMUS+ INCOMING STUDENTS

I. Administrative & Enrollment Procedures

1. **Learning Agreements:** Students must update their Learning Agreements as soon as possible, but no later than one month after arrival at the Poznań University of Physical Education.
2. **Course Availability:** Subjects are offered in English based on demand. A minimum of 50% of incoming students must select a specific subject for it to be conducted in English.
3. **Subject Limits:** For organizational and financial reasons, each faculty offers a maximum of 10 subjects per semester (limited to 5 subjects for Physiotherapy students).

II. Attendance & Classroom Conduct

4. **Mandatory Attendance:** Attendance is compulsory for all chosen classes and lectures. The maximum absence limit is 10% (one meeting per semester).
5. **Punctuality:** Students are required to arrive at all classes on time.
6. **Withdrawal Policy:** If a student decides to resign from a subject, they must inform the Institutional Coordinator, the Faculty Coordinator, and the teacher in writing and in advance. Failure to provide written notice will result in a failing grade due to absence.

III. Credits & Documentation

7. **Earning Credits:** To receive course credits, students must participate in all classes and successfully complete the required exam or project.
8. **Transcript of Records (ToR):** Official transcripts including all awarded grades will be sent directly to the partner institution's coordinator within one month of the semester's end.
9. **Confirmation of Stay:** In accordance with bilateral agreements, the International Office will confirm only the study period that corresponds to the actual first and last day of the student's stay at the University.

IV. Support

10. **Problem Resolution:** In the event of any academic or administrative issues, students should contact their Institutional Coordinator immediately.

DEPARTMENT : PHYSIOTHERAPY

The list of subjects for ERASMUS+ incoming students

FIELD OF STUDY: PHYSIOTHERAPY**LIST OF SUBJECTS 2026/2027****LIST OF SUBJECTS ONLY FOR PHYSIOTHERAPY STUDENTS**

No.	SUBJECT	HOURS/ ECTS	FORM OF PASSING
Practical subjects – winter and summer semester			
ERA-FIZ-CPIPI	Clinical Practices in Physiotherapy I (Praktyki kliniczne z zakresu fizjoterapii)	15-20/1	Pass
ERA-FIZ-CPIPII	Clinical Practice II - Medical Care and Rehabilitation Centre (Praktyki kliniczne z zakresu fizjoterapii)	15-20/1	Pass
ERA-FIZ-CPIPIII	Clinical Practices in Physiotherapy III (Praktyki kliniczne z zakresu fizjoterapii)	15-20/1	Pass
Theoretical subjects – summer semester ONLY!			
ERA-FIZ-KIPAS	Kinesiotaping in Physiotherapy and Sport (Kinesiotaping w fizjoterapii i sporcie)	15/4	Practical exam
ERA-FIZ- TBOMM	The Basics of McKenzie Method and Diagnostics of Gross and Fine Motor Skills with Functional Movement Screen (FMS™) (Podstawowe zagadnienia dotyczące terapii metodą McKenzie)	20/5	Exam
ERA-FIZ-NR	Neurological Rehabilitation (Rehabilitacja neurologiczna)	20/5	Pass
ERA-FIZ- OATTJT	Osteopathic Approach to Temporomandibular Joint Therapy (Osteopatyczne podejście do terapii stawów skroniowo-żuchwowych)	15/4	Practical exam
ERA-FIZ-DOCBP	Dysfunction of Children Body Posture (Zaburzenia i dysfunkcje postawy ciała u dzieci)	20/5	Pass
ERA-FIZ-DATM	Diagnostic and Therapeutic Methods for Upper Extremity Dysfunctions in Neurological Conditions (Badanie i rehabilitacja dysfunkcji kończyn górnych w schorzeniach neurologicznych)	15/4	Practical exam
ERA-FIZ- MTACSIP	Modern Technologies and Clinical Simulation in Physiotherapy (Nowoczesne Technologie i Symulacja Kliniczna w Fizjoterapii)	15/4	Pass
ERA-FIZ- APAOD	Adapted Physical Activity of Disabled (Aktywność fizyczna osób niepełnosprawnych)	15/4	Pass
ERA-FIZ-SMAT	Sports Medicine and Traumatology with first aid (Medycyna sportu i traumatologia z elementami	15/4	Exam

	pierwszej pomocy)		
ERA-FIZ-MOTBS	Methodology of Teaching Basic Swimming for Children with Elements of Halliwick Method (Metodyka Nauczania Pływania Podstawowego z Elementami Terapii Wodnej Halliwick)	15/4	Pass
ERA-FIZ-PAIMH	Physical Activity in Musculoskeletal Health (Aktywność fizyczna a zdrowie układu mięśniowo-szkieletowego)	15/4	Pass
ERA-WF-PAOPW	Physical Activity of Pregnant Women (Aktywność Fizyczna Kobiet w Cięży)	15/4	Pass
ERA-WF-CCE	Cognicise: cognition & exercise (Cognicise: ćwicz i myśl)	15/4	Practical exam
ERA-WF-HE	Health Education (Edukacja zdrowotna)	15/4	Exam
ERA-WF-YOG	Yoga (Joga)	15/4	Pass
<p style="text-align: center;">Hybrid Exchange Module – / English-friendly course -classes for incoming students integrated with local students/</p>			
ERA-FIZ-FDIMD	Functional Diagnostics in Musculoskeletal Dysfunctions (Diagnostyka funkcjonalna w dysfunkcjach narządu ruchu)	35/9	Practical exam
ERA-FIZ-CPIMDIN	Clinical Physiotherapy in Musculoskeletal Dysfunctions in Neurology and Neurosurgery (Fizjoterapia kliniczna w dysfunkcjach układu ruchu w neurologii i neurochirurgii)	28/7	Practical exam
ERA-FIZ-HAWWT	Halliwick and Watsu water therapies (Terapie wodne Halliwick i Watsu)	20/5	Pass

Subject	PRAKTYKI KLINICZNE Z ZAKRESU FIZJOTERAPII I CLINICAL PRACTICES IN PHYSIOTHERAPY I
Unit of AWF	Poznańskie Centrum Fizjoterapii Funkcjonalnej sp. z o.o., Mostowa 6 Street, floor 4, Poznań
Teacher's name	Magdalena Goliwås, PT, PhD
ECTS points	In accordance with your Learning Agreement, 1 ECTS credit is equivalent to 15-20 workload hours.
Number of hours	In accordance with your Learning Agreement
Assessment methods	<ul style="list-style-type: none"> •Active participation in the classes (one absence allowed) •Preparation for classes (doing home tasks) •Preparation of a patient treatment plan
Learning Outcomes	<p><i>This course is designed for physiotherapy students. Basic knowledge of human anatomy and biomechanics is required. The course will cover basic orthopaedic conditions and various conditions of musculoskeletal system and neurological patient like:</i></p> <ul style="list-style-type: none"> •Degenerative changes in various joints •Disorders of bones and soft tissues (fractures, sprains, strains, inflammations) •Tendons and ligamentous injuries (raptures) •Low back pain •Open and close fractures •Various joints replacements •Reconstructive surgery •Other orthopaedic conditions •Functional assessment of patient after stroke <p><i>Practical classes will be held at the rehabilitation room, where students will be able to observe physiotherapists during their work with the patient, perform some basic procedures / evaluations and carry out exercises with the patient.</i></p> <ul style="list-style-type: none"> •Presentation and supervision of exercises performed by patients recommended by the leading physiotherapist •Operation of equipment and selected measuring devices •Learning to perform basic functional assessment tests •Analysing test results and proper clinical reasoning •Learning techniques to reduce muscle tension <p><i>Participation in the development of a patient treatment plan</i></p>

Topics of the classes	<ul style="list-style-type: none"> • <i>Nonoperative treatment of acute and overuse injuries of lower and upper extremities.</i> • <i>Rehabilitation of the upper extremity (shoulder, elbow, wrist) after common arthroscopic procedures.</i> • <i>Rehabilitation of the lower extremity (hip, knee, ankle) after common arthroscopic procedures.</i> • <i>Practical approach to rehabilitation (demonstration of exercises, justification for selection of exercises and sequence of their execution).</i> • <i>Differences in rehabilitation of the professional athletes.</i> <p><i>Biomechanical evaluation and return to sport criteria after injury / surgery.</i></p>
Recommended literature	<ul style="list-style-type: none"> • <i>Bobath B.: Adult Hemiplegia: Evolution and Treatment, Oxford 1990</i> • <i>Peter Brukner, Karim Khan "Clinical Sports Medicine" McGraw-Hill Education / Australia 2012, 4th Edition</i> • <i>S. Brent Brotzman, Kevin E. Wilk "Clinical Orthopaedic Rehabilitation" Mosby 2003, 2nd Edition (or new edition: Charles E. Giangarra, Robert C. Manske "Clinical Orthopaedic Rehabilitation: A Team Approach" Elsevier 2017, 4th Edition)</i>

Subject	PRAKTYKI KLINICZNE II
	CLINICAL PLACEMENT II- MEDICAL CARE AND REHABILITATION
Unit of AWF	Zakład Opiekuńczo - Leczniczy i Rehabilitacji Medycznej, (Medical Care and Rehabilitation Center), Mogileńska 42 Street, 61-044 Poznań
Teacher's name	Jakub Urbanowicz PT , MSc, Martyna Reinholz, PT, MSc
ECTS points	In accordance with your Learning Agreement, 1 ECTS credit is equivalent to 15–20 workload hours.
Number of hours	In accordance with your Learning Agreement
Assessment methods	<ul style="list-style-type: none"> - Active participation in the classes - Preparation of a patient treatment plan, adequate to the type of injury / surgery and rehabilitation period
Learning Outcomes	<p>Students can:</p> <ul style="list-style-type: none"> - examine the functional patient after injury and in the course of neurological diseases - plan and carry rehabilitation procedures
Topics of the classes	<ul style="list-style-type: none"> – Rehabilitation in neurology: Encephalitis, Meningitis, Stroke, Cerebral Palsy, Brain Injuries, Multiple Sclerosis, Parkinson's and Alzheimer's Diseases, SLA – Pathological Manifestation of aging, Musculoskeletal and Neurological disorders and disease, Cognitive disorders, Cardiovascular, Pulmonary, Skin conditions and diseases, Metabolic pathologies – Various condition of Musculoskeletal System: Arthritic conditions, disorders of bones and soft tissues (fractures, sprains, strains, inflammations), upper and lower limb, spinal deformities and disorders, musculoskeletal pain management
Recommended literature	

Subject	<p>PRAKTYKI KLINICZNE Z ZAKRESU FIZJOTERAPII III</p> <p>CLINICAL PRACTICES IN PHYSIOTHERAPY III</p>
Unit of AWF	Unit/Department of Sports Medicine and Traumatology, CORE clinic , Droga Dębińska 10c Street, 61-555 Poznań
Teacher's name	Przemysław Lutomski, PT, PhD
ECTS points	In accordance with your Learning Agreement, 1 ECTS credit is equivalent to 15–20 workload hours.
Number of hours	In accordance with your Learning Agreement
Assessment methods	<ul style="list-style-type: none"> - Active participation in the classes (one absence allowed) - Preparation for classes (doing home tasks) - Preparation of a patient treatment plan, adequate to the type of injury / surgery and rehabilitation period
Learning Outcomes	<p>Knowledge about common injuries in sport and the way of evaluation/examination and treatment;</p> <p>Manual Therapy – diagnosis/evaluation and treatment</p> <p>Orthopedic rehabilitation after knee and feet surgery</p>
Topics of the classes	<p>Definitions: Trauma/injuries/overuse syndromes</p> <p>Manual Techniques in Practice</p> <p>Diagnosis, first aid and treatment in traumatology and manual medicine/physiotherapy</p> <p>Principles of injury prevention</p> <p>Aqua therapy</p> <p>Children posture defects</p>

Subject	KINESIOTAPING W FIZJOTERAPII I SPORTCIE
	KINESIOTAPING IN PHYSIOTHERAPY AND SPORT
Unit of AWF	Department of Kinesiotherapy Developmental Physiotherapy (Zakład Kinezyterapii i Fizjoterapii wieku Rozwojowego)
Teacher's name	Łukasz Michałowski , PT, PhD
ECTS points	4
Number of hours	15
Assessment methods	<ol style="list-style-type: none"> 1. <i>Practical classes, workshop.</i> 2. <i>The evaluation process consist of preparation to the classes and practical test.</i>
Learning Outcomes	<ol style="list-style-type: none"> 1. <i>The aim of the classes is acquiring knowledge in the theory of the Kinesiotaping method</i> 2. <i>Acquiring the ability to effectively apply the tape in specific clinical cases</i> 3. <i>Student after classes has knowledge of the principles of using the Kinesiotaping method, including indications and contraindications</i> 4. <i>Independently performs all types of applications learned on the classes</i> 5. <i>Is able to select the appropriate type of application for a clinical unit.</i>
Topics of the classes	<ol style="list-style-type: none"> 1. <i>Introduction to the concept of the Kinesiotaping method: history, application, properties of Kinesio tape.</i> 2. <i>The impact of Kinesio tape on the skin and superficial and deep fascia.</i> 3. <i>Tape application rules.</i> 4. <i>Tape removal methods.</i> 5. <i>Contraindications, precautions and guidelines for the use of the Kinesio Taping Method</i> 6. <i>Sample applications using kinesio tape for muscle relaxation, muscle stimulation, analgesic, stabilizing and lymphatic.</i>
Recommended literature	<p><i>Clinical Therapeutic Applications of the Kinesio Taping Method by Kenzo Kase, Jim Wallis, Tsuyoshi Kase.</i></p>

Subject	PODSTAWOWE ZAGADNIENIA DOTYCZĄCE TERAPII METODĄ MCKENZIE ORAZ METODA FUNCTIONAL MOVEMENT SCREEN (FMS™) JAKO PRZYKŁAD GLOBALNEJ DIAGNOSTYKI FUNKCJONALNEJ THE BASICS OF MCKENZIE METHOD AND DIAGNOSTICS OF GROSS AND FINE MOTOR SKILLS WITH FUNCTIONAL MOVEMENT SCREEN (FMS™)
Unit of AWF	Department of Kinesiotherapy Developmental Physiotherapy (Zakład Kinezyterapii i Fizjoterapii wieku Rozwojowego)
Teacher's name	Łukasz Michałowski, PT, PhD
ECTS points	5
Number of hours	20
Assessment methods	<i>Practical classes, workshop. The evaluation process consist of preparation to the classes and practical and written tests.</i>
Learning Outcomes	<p><i>McKenzie Method is a concept based on knowledge of symptoms and the analysis of behavior of complaints and joint mechanics (motion segment), in an interview and physical examination. Examination of the McKenzie Method allows to determine the direction of movement of the damaged tissue so the therapist can determine which body movement can push those tissues back on the right place. McKenzie treatment uniquely emphasizes education and active patient involvement in the management of their treatment in order to decrease pain quickly, and restore function and independence, minimizing the number of visits to the clinic.</i></p> <p><i>The Functional Movement Screen (FMS™) is an assessment technique, which attempts to identify imbalances in mobility and stability during fundamental movement patterns. This assessment tool is thought to exacerbate the individual's compensatory movement problems, allowing for easy identification. It is these movement flaws that may lead to breakdown in the kinetic linking system, causing inefficiency and microtrauma during activity. In many cases, muscle flexibility and strength imbalances along with previous injuries may not be identified. These problems, which have been acknowledged as significant risk factors for injury, will be identified using the FMS™.</i></p>
Topics of the classes	<ol style="list-style-type: none"> <i>1. The principles of McKenzie Method and Functional Movement Screen (FMS™).</i> <i>2. Definitions and terms used in the McKenzie Method and Functional Movement Screen (FMS™).</i> <i>3. Forms and documents used in the McKenzie Method and</i>

-
- Functional Movement Screen (FMS™); The ranking and grading system.*
4. *The epidemiology of body disorders; Injury prevention.*
 5. *Pain patterns and mechanism of pain production.*
 6. *The McKenzie classification of spinal pain; Treatment of the anatomical disruption or displacement within the motion segment (Derangement Syndrome). Treatment of the end-range stress of normal structures (Postural Syndrome) and end-range stress of shortened structures (Dysfunction Syndrome).*
 7. *Biomechanics and movement patterns; Limitations of strength, balance and range of motion.*
 8. *Functional Movement Screen (FMS™) - tool for analysing the stability of body segments during movement; Part of the comprehensive physiotherapeutic and biomechanical assessment of physically active persons as an element of primary prevention of sport injuries.*
 9. *Physical examination and assessment in McKenzie Method and Functional Movement Screen (FMS™)*
 10. *The mechanical therapy procedures; education of the patient and patient involvement in the treatment; Corrective exercise to restore movement patterns.*
 11. *Proper movement and building strength on it.*
-

literature**

Subject	REHABILITACJA NEUROLOGICZNA
	NEUROLOGICAL REHABILITATION
Unit of AWF	Department of Musculoskeletal Physiotherapy (Zakład Rehabilitacji Narządu Ruchu) Department of Neuromuscular Physiotherapy (Zakład Fizjoterapii Nerwowo-mięśniowej)
Teacher's name	Magdalena Goliwās, PT, PhD Joanna Małeckā, PT, PhD
ECTS points	5
Number of hours	20
Assessment methods	<i>Active participation in the classes. Practical classes, workshop.</i>
Learning Outcomes	<p><i>After completing this course, the student:</i></p> <ul style="list-style-type: none"> - <i>Has the ability to carry out a structural and functional assessment of a patient after a stroke</i> - <i>Understands the differences between patients with acute and chronic stroke</i> - <i>Knows the techniques applied to increased muscle tension</i> - <i>Knows therapeutic strategies in patients after a stroke</i>
Topics of the classes	<ol style="list-style-type: none"> <i>1. Basic assessment of neurological patient (after stroke, cranio-cerebral trauma)</i> <i>2. Test used for functional assessment: Time up and Go, Berg Balance Scale, Fugl-Meyer Test, Stroke Rehabilitation Assessment of Movement</i> <i>3. Techniques to reduce muscle tension</i> <i>4. Differences in management of acute and chronic phase after stroke and cranio-cerebral trauma</i> <i>5. Practical training with the patient on the mat</i>
Recommended literature	<ol style="list-style-type: none"> <i>1. Rain S., Meadows L., Lynch-Ellerington M.: Bobath Concept Theory and Clinical Practice I Neurological Rehabilitation. Wiley-Blackwell; 2009</i> <i>2. Bobath B.: Adult Hemiplegia: Evolution and Treatment, 3rd end. Butterworth-Heinemann; Oxford 1990</i>

Subject	OSTEOPATYCZNE PODEJŚCIE DO TERAPII STAWÓW SKRONIOWO-ŻUCHWOWYCH
	OSTEOPATHIC APPROACH TO TEMPOROMANDIBULAR JOINT THERAPY
Unit of AWF	Department of Neuromuscular Physiotherapy (Zakład Fizjoterapii Nerwowo-mięśniowej)
Teacher's name	Katarzyna Adamczewska, PT, PhD
ECTS points	4
Number of hours	15
Assessment methods	<i>The evaluation consists of practical examination</i>
Learning Outcomes	<p><i>The aim of this course is to present osteopathic concept of diagnosing and treating the temporomandibular joint (TMJ) and to provide them with practical skills for clinical application.</i></p> <p><i>Objectives of the subject:</i></p> <ul style="list-style-type: none"> • <i>Student should be able to present patterns and techniques of osteopathic TMD therapy.</i> • <i>Student should be able to perform a comprehensive osteopathic assessment of the stomatognathic system.</i> • <i>Student should be able to apply manual techniques (myofascial, articular, and cranial) to treat TMJ dysfunctions in clinical practice.</i>
Topics of the classes	<ol style="list-style-type: none"> <i>1. Basic assessment of neurological patient (after stroke, cranio-cerebral trauma)</i> <i>2. Test used for functional assessment: Time up and Go, Berg Balance Scale, Fugl-Meyer Test, Stroke Rehabilitation Assessment of Movement</i> <i>3. Techniques to reduce muscle tension</i> <i>4. Differences in management of acute and chronic phase after stroke and cranio-cerebral trauma</i> <i>5. Practical training with the patient on the mat</i>
Recommended literature	<ol style="list-style-type: none"> <i>1. Rain S., Meadows L., Lynch-Ellerington M.: Bobath Concept Theory and Clinical Practice I Neurological Rehabilitation. Wiley-Blackwell; 2009</i> <i>2. Bobath B.: Adult Hemiplegia: Evolution and Treatment, 3rd end. Butterworth-Heinemann; Oxford 1990</i>

Subject	ZABURZENIA I DYSFUNKCJE POSTAWY CIAŁA U DZIECI
	DYSFUNCTION OF CHILDREN BODY POSTURE
Unit of AWF	Department of Kinesiotherapy Developmental Physiotherapy (Zakład Kinezyterapii i Fizjoterapii wieku Rozwojowego)
Teacher's name	Marta Flis-Masłowska, PT, PhD (NMT, European Neuromuscular Therapist)
ECTS points	5
Number of hours	20
Assessment methods	<i>Practical classes, workshop. The evaluation consists on practical tests and power point presentation.</i>
Learning Outcomes	<p><i>The objective of this course is to provide students with knowledge on the types of body dysfunctions, use of functional assessment of children posture, physical examination and education of the patient. Moreover, students are able to practical use of Thera-Band exercise bands and basic myofascial therapeutic techniques.</i></p> <p>Objectives of the subject:</p> <ul style="list-style-type: none"> - <i>diagnosis with shaping body posture and postural control in ontogenesis.</i> - <i>learning individual and team preventive and corrective actions, adequate to postural disorders and various rehabilitation method.</i>
Topics of the classes	<ol style="list-style-type: none"> 1. <i>Analysis of the formation and changes within the body posture and anatomic-physiological conditions.</i> 2. <i>The mechanism of shaping the body posture - biomechanical interpretation.</i> 3. <i>Characteristics of the correct posture.</i> 4. <i>Muscle balance and disbalance in the pelvic, thoracic, dorsal, abdominal and knee areas.</i> 5. <i>Diagnostic various methods used in the assessment of postural disorders.</i> 6. <i>Disfunction of the posture in the sagittal plane: the concave back, the round one, the back round - concave, flat back.</i> 7. <i>Individual and team corrective procedures. Use of Thera-Band tapes in posture defects therapy.</i>
Recommended literature	<i>Articles in scientific body posture journals are recommended.</i>

Subject	BADANIE I REHABILITACJA DYSFUNKCJI KOŃCZYN GÓRNYCH W SCHORZENIACH NEUROLOGICZNYCH DIAGNOSTIC AND THERAPEUTIC METHODS FOR UPPER EXTREMITY DYSFUNCTIONS IN NEUROLOGICAL CONDITIONS
Unit of AWF	Department of Neuromuscular Physiotherapy (Zakład Fizjoterapii Nerwowo-mięśniowej)
Teacher's name	Joanna Małecka, PT, PhD
ECTS points	4
Number of hours	15
Assessment methods	<i>The evaluation consists of a practical examination</i>
Learning Outcomes	<p><i>The aim of this course is to familiarize students with neurological examination of the upper extremity and to equip them with the skills to create rehabilitation programs for such conditions.</i></p> <p><i>Objectives of the subject:</i></p> <ul style="list-style-type: none"> • <i>The student will be able to find and use proper evidence-based outcome measures to assess upper extremity dysfunctions in neurological patients.</i> • <i>The student will learn how to treat upper extremity dysfunctions using neurodevelopmental treatment methods.</i>
Topics of the classes	<ol style="list-style-type: none"> 1. <i>Evidence-based diagnostic tools for upper extremity assessment.</i> 2. <i>Characteristics of upper extremity dysfunctions in neurological conditions.</i> 3. <i>Cognitive Therapeutic Exercises in upper extremity rehabilitation.</i> 4. <i>Elements of the NDT-Bobath concept for adults in upper extremity neurorehabilitation.</i> 5. <i>Elements of the PNF method in upper extremity rehabilitation.</i>
Recommended literature	<p><i>Bobath Concept: Theory and Clinical Practice in Neurological Rehabilitation; Raine, Meadows, Lynch–Ellerington; Wiley-Blackwell, 2009</i></p> <p><i>PNF in Practice; Adler, Susan S.; Beckers, Dominiek; Buck, Math; Springer-Verlag GmbH, 2021</i></p> <p><i>Physical Rehabilitation, O'Sullivan, Schmitz, Fulk; F.A.Davis Company, 2014</i></p> <p><i>Articles on neurological rehabilitation topics.</i> neuropt.org, sralab.org</p>

Subject	NOWOCZESNE TECHNOLOGIE I SYMULACJA KLINICZNA W FIZJOTERAPII
	MODERN TECHNOLOGIES AND CLINICAL SIMULATION IN PHYSIOTHERAPY
Unit of AWF	Department of Neuromuscular Physiotherapy (Zakład Fizjoterapii Nerwowo-mięśniowej)
	Department of Kinesiotherapy Developmental Physiotherapy (Zakład Kinezyterapii i Fizjoterapii wieku Rozwojowego)
Teacher's name	Joanna Małecka, PT, PhD
	Katarzyna Adamczewska, PT, PhD Łukasz Michałowski, PT, PhD
ECTS points	4
Number of hours	15
Assessment methods	<i>Active participation in the classes.</i>
Learning Outcomes	<i>The aim of this course is to provide students with advanced practical skills in using modern technologies within a high-fidelity clinical simulation environment. By bridging theory and practice, the subject enables hands-on training with robotic-assisted systems and VR, focusing on developing clinical reasoning for patients with complex neurological and musculoskeletal conditions.</i>
Topics of the classes	1. <i>Hands-on experience with robotic-assisted rehabilitation systems (Armeo Power, Bertec, Huber 360, Diers...).</i>
	2. <i>Practical use of advanced diagnostic tools and biofeedback systems.</i>
	3. <i>Integration of virtual reality (VR) and motion sensors in therapeutic protocols.</i>
	4. <i>Analysis of kinetic and kinematic parameters using modern assessment instrumentation.</i>
Recommended literature	

Subject	AKTYWNOŚĆ FIZYCZNA OSÓB NIEPEŁNOSPRAWNYCH ADAPTED PHYSICAL ACTIVITY OF DISABLED
Unit of AWF	Department of Adapted Physical Activity (Zakład Adaptowanej Aktywności Fizycznej)
Teacher's name	Maciej Wilski, PT, PhD
ECTS points	4
Number of hours	15
Assessment methods	<i>Student's presentation. Practical classes, workshop.</i>
Learning Outcomes	<p><i>After completing this course, the student:</i></p> <ul style="list-style-type: none"> - <i>develops the competences necessary to work with disabled athletes</i> - <i>develops teaching, training, and coaching skills, needed for a well-balanced approach in educational and sports environment</i> - <i>develops knowledge of Paralympic sports and adaptive activities.</i>
Topics of the classes	<p><i>A. Foundational topics in APA (Adapted Physical Activity), history, purposes, aims, goals, and objectives of sports for disabled persons, disability based sport organizations, disability sport terminology.</i></p> <p><i>B. Winter and summer Paralympic sports, team sports for disabled persons. Practical training:</i></p> <ul style="list-style-type: none"> - <i>Goalball</i> - <i>Wheelchair Rugby</i> - <i>Boccia</i> <p><i>C. Active rehabilitation – history, purposes, aims, goals, organizations and practical training.</i></p> <p><i>D. Social and psychological advantages of sports of the disabled</i></p>
Recommended literature	<p><i>Sherill C.: Adapted physical activity, recreation and sport. The McGraw-Hill Companies, 1998</i></p> <p><i>Winnick, J., & Porretta, D. (Eds.). (2016). Adapted Physical Education and Sport, 6E. Human Kinetics.</i></p>

Subject	MEDYCYNĄ SPORTU I TRAUMATOLOGIA Z ELEMENTAMI PIERWSZEJ POMOCY
	SPORTS MEDICINE AND TRAUMATOLOGY WITH FIRST AID
Unit of AWF	Department of Sports Medicine and Traumatology/ Zakład Medycyny Sportu i Traumatologii
Teacher's name	Maciej Jurasz, PT, PhD, OMT, FDM IC
ECTS points	4
Number of hours	15
Assessment methods	<i>Written test/student's presentation the topic of choice</i>
Learning Outcomes	<i>Knowledge about common injuries in sport and the way of evaluation/examination and treatment.</i>
	<i>Manual Therapy – diagnosis/evaluation and treatment Knowledge and skills in BLS field (first aid in both posttraumatic and non-traumatic situations)</i>
Topics of the classes	<i>Definitions:</i>
	<i>Trauma/injuries/overuse syndromes</i>
	<i>Classifications of most common injuries</i>
	<i>Manual Techniques in Practice</i>
	<i>Diagnosis, first aid and treatment in traumatology and manual medicine/physiotherapy</i>
	<i>[BLS/ (Basic Life Support) according to ERC (Europe. Resuscitation Council)]</i>
Recommended literature	<i>ed. Bahr Roald, The IOC Manual of Sports Injuries, Wiley-Blackwell, 2012</i>

Subject	METODYKA NAUCZANIA PŁYWANIA PODSTAWOWEGO Z ELEMENTAMI TERAPII WODNEJ HALLIWICK METHODOLOGY OF TEACHING BASIC SWIMMING FOR CHILDREN WITH ELEMENTS OF HALLIWICK METHOD
Unit of AWF	Department of Swimming and Water Lifesaving (Zakład Pływania i Ratownictwa Wodnego)
Teacher's name	Krystian Wochna, PhD
ECTS	4
Number of hours	15
Assessment methods	<i>Pass practical classes Prepare lesson plans</i>
Learning Outcomes	<ol style="list-style-type: none"> <i>The aim of the subject is to educate students in methodology of teaching basic swimming for children.</i> <i>Staging the process of teaching swimming.</i> <i>Describing of using the Halliwick method.</i>
Topics of the classes	<i>3 classes – lectures: Water environmental features Educational aspects of the swimming teaching process Assumptions of the Halliwick Method 8 classes – exercises: Methods, forms and principles of teaching children swimming, practical use of a play form, stroke mechanics, The Halliwick Ten Point Programme, Plans preparation 8 classes – exercises: Conducting classes by students according to their plans</i>
Recommended literature	<ol style="list-style-type: none"> <i>Peden, A.E.; Franklin, R.C. Learning to Swim: An Exploration of Negative Prior Aquatic Experiences Among Children. Int. J. Environ. Res. Public Health 2020, 17:3557</i> <i>Jerszyński, D.; Antosiak-Cyrak, K.; Habiera, M.; Wochna, K.; Rostkowska, E.Changes in selected parameters of swimming technique in the back crawl and the front crawl in young novice swimmers. Journal of Human Kinetics 2013, 37:161-171.</i> <i>Tripp, F.; Krakow, K. Effects of an aquatic therapy approach (Halliwick-Therapy) on functional mobility in subacute stroke patients: a randomized controlled trial. Clin Rehabil 2014, 28(5):432-9.</i>

Subject	AKTYWNOŚĆ FIZYCZNA A ZDROWIE UKŁADU MIĘŚNIOWO-SZKIELETOWEGO
	PHYSICAL ACTIVITY IN MUSCULOSKELETAL HEALTH
Unit of AWF	Department of Swimming and Water Lifesaving (Zakład Pływania i Ratownictwa Wodnego)
Teacher's name	Krystian Wochna, PhD
ECTS	4
Number of hours	15
Assessment methods	<i>Active participation in the classes (worksheets) Student's presentation</i>
Learning Outcomes	<i>Students will gain knowledge in the field of supporting physical activity planning in light of bone metabolism and strength, as well as the characteristics of skeletal muscles.</i>
Topics of the classes	<i>Bone tissue metabolism and physical activity</i> <ul style="list-style-type: none"> <i>bone cells - mechanical stimulation</i> <i>areal bone mineral density</i> <i>femur strength index</i> <i>dual X-ray absorptiometry measurements</i> <i>Analysis of skeletal muscle characteristics</i> <ul style="list-style-type: none"> <i>the peak torques</i> <i>muscle stiffness and elasticity</i> <i>muscle–bone crosstalk</i> <i>The role of carbohydrate metabolic indices</i> <ul style="list-style-type: none"> <i>insulin resistance index</i> <i>glucose, insulin</i>
Recommended literature	<ol style="list-style-type: none"> 1. Morseth, B. Emaus, N. Jørgensen, L. (2011) Physical activity and bone: The importance of the various mechanical stimuli for bone mineral density. <i>Norsk Epidemiologi</i>, 20, 173–178. 2. Wochna, K., Stemplewski, R., Leszczyński, P. et al. (2026) Relationships of bone mineral density and femur strength index with aerobic capacity, body composition and carbohydrate metabolic indices in postmenopausal women. <i>Applied Sciences</i>, 16(5), 2338. 3. Subject	AKTYWNOŚĆ FIZYCZNA KOBIET W CIĄŻY
	PHYSICAL ACTIVITY OF PREGNANT WOMEN
Unit of AWF	Department of Physical Activity Sciences and Health Promotion (Zakład Nauk o Aktywności Fizycznej i Promocji Zdrowia)
Teacher's name	Ida Laudańska-Krzemińska, Ass. Professor, Aneta Worska, MSc
ECTS points	4
Number of hours	15
Assessment methods	Test of practical and theoretical skills Participating in the course actively
Learning Outcomes	<ul style="list-style-type: none"> - The student will know the recommendations for physical activity in pregnancy and the correct structure of physical activities for each trimester of pregnancy. - The student will be able to select and adjust the recommended forms of physical activity for pregnant women and indicate the non-recommended as well as contraindications to their use. - The student will demonstrate an attitude of interest in lifelong care of the body and health, including at special moments in life like pregnancy.
Topics of the classes	<ul style="list-style-type: none"> - Pregnancy as a unique moment in a woman's life - changes in the body relevant to women's physical activity. Selected health measures of quality of life and activity of pregnant women. - Recommendations of various organizations and societies on physical activity of pregnant and post-pregnant women - a critical analysis. - Indications and contraindications, self-assessment and self-observation of warning signs related to activity during pregnancy and postpartum. - New technologies related to physical activity of pregnant women - where to look for reliable information? The "Instastory" phenomenon - dangers and pitfalls of social media. - Structure of physical activities for pregnant women. Duration, frequency, intensity, type of exercise, exercise positions, childbirth preparation exercises – practical classes. - Physical activity with infants – examples of exercises for postpartum women and their babies – practical classes.

Subject	JOGA
	THE BREATH IN CONNECTION WITH PERFORMED ASANAS
Unit of AWF	Department of Dance and Fitness (Zakład Tańca i Fitnessu)
Teacher's name	Andrzej Adamczak
ECTS points	4
Number of hours	15
Assessment methods	<i>1. Introduction to yoga</i>
	<i>2. Concentration on the breath in connection with performed asanas</i>
	<i>3. How to use muscles in yoga positions</i>
Learning Outcomes	<i>1. Student knows the basics of yoga's asana</i>
	<i>2. Student knows how to use the breath when correctly performing asanas</i>
	<i>3. Student can perform strengthening and stretching exercises</i>
Topics of the classes	<i>1. Teaching selected asanas</i>
	<i>2. Using the breath correctly</i>
	<i>3. Teaching the exact exercise of individual asanas</i>
Recommended literature	

Subject	DIAGNOSTYKA FUNKCJONALNA W DYSFUNKCJACH NARZĄDU RUCHU
	FUNCTIONAL DIAGNOSTICS IN MUSCULOSKELETAL DYSFUNCTIONS
Unit of AWF	Department of Neuromuscular Physiotherapy (Zakład Fizjoterapii Nerwowo-mięśniowej)
Teacher's name	Katarzyna Adamczewska, PT, PhD Joanna Małecka, PT, PhD
ECTS points	9
Number of hours	35
Assessment methods	Multimedia presentation with elements of discussion. Demonstration, instruction, and practical exercises. Practical exam.
Learning Outcomes	<i>The course aims to provide students with comprehensive knowledge of the principles, reliability, and documentation of clinical diagnostics in musculoskeletal and neurological dysfunctions, while developing practical skills in performing specialized physiotherapy examinations with strict adherence to safety protocols.</i>
Topics of the classes	<i>Program Content:</i>
	<ol style="list-style-type: none"> 1. Clinical interview and patient history. 2. Cranial nerve assessment and interpretation. 3. Perception and sensory testing. 4. Cervical-shoulder complex diagnostics. 5. Orthopedic tests: head, neck, and upper extremity. 6. Upper and lower limb: neurological exam and dermatomes.
Recommended literature	<ol style="list-style-type: none"> 1. Shirley Sahrmann and Associates. Movement system impairment syndromes. Elsevier 2. O'Sullivan S.B., Schmitz T.J., Fulk G. Physical Rehabilitation. F.A.Davis 3. Cleland J., Koppenhaver S., Su J. Netter's Orthopaedic Clinical Examination: An Evidence-Based Approach. Elsevier 4. Laver Fawcett A.J. Subject	FIZJOTERAPIA KLINICZNA W DYSFUNKCJACH UKŁADU RUCHU W NEUROLOGII I NEUROCHIRURGII
	CLINICAL PHYSIOTHERAPY IN MUSCULOSKELETAL DYSFUNCTIONS IN NEUROLOGY AND NEUROSURGERY
Unit of AWF	Department of Neuromuscular Physiotherapy (Zakład Fizjoterapii Nerwowo-mięśniowej)
Teacher's name	Assoc. Prof. Dawid Łochyński, PT, PhD Lech Furmaniuk, PT, PhD Edyta Wdowiak, PT, PhD Joanna Małecka, PT, PhD
ECTS points	7
Number of hours	28
Assessment methods	Multimedia presentation with elements of discussion Demonstration, instruction, and practical exercises Practical exam
Learning Outcomes	To acquire the fundamental knowledge and skills necessary to perform functional assessment in various disorders of the peripheral and central nervous systems. To acquire basic knowledge and skills in performing specialized procedures, applying therapeutic methods, planning physiotherapy interventions, and evaluating their outcomes in the field of peripheral and central nervous system rehabilitation.
Topics of the classes	The course focuses on advanced functional assessment and the implementation of evidence-based physiotherapy strategies for central and peripheral nervous system disorders, including Parkinson's disease, MS, ALS, vestibular disorders, and traumatic spinal cord or brain injuries
Recommended literature	1. O'Sullivan S.B., Schmitz T.J., Fulk G. <i>Physical Rehabilitation</i> . Wydawnictwo F.A.Davis 2. Carolyn Kisner, Lynn Allen Colby. <i>Therapeutic Exercise: Foundations and Techniques</i> . F.A. Davis Company.

Subject	TERAPIE WODNE HALLIWICK I WATSU
	HALLIWICK AND WATSU WATER THERAPIES
Unit of AWF	Department of Swimming and Water Lifesaving (Zakład Pływania i Ratownictwa Wodnego)
Teacher's name	Krystian Wochna, PhD Katarzyna Antosiak-Cyrak, PhD
ECTS points	5
Number of hours	20
Assessment methods	<i>Pass practical classes</i>
	<i>Prepare lesson plans</i>
Learning Outcomes	<ol style="list-style-type: none"> 1. <i>The aim of the subject is to educate students in methodology of teaching basic swimming for children.</i> 2. <i>Staging the process of teaching swimming.</i> 3. <i>Description of water therapy applications - Halliwick and Watsu.</i>
Topics of the classes	<p><i>2 classes – lectures:</i> <i>Water environmental features</i> <i>Educational aspects of the swimming teaching process</i> <i>Assumptions of the Halliwick and Watsu Methods</i></p> <p><i>6 classes – exercises:</i></p> <ol style="list-style-type: none"> 1. <i>Methods, forms and principles of teaching children swimming, practical use of a play form, strokemechanics, The Halliwick Ten Point Programme, Plans preparation</i> 2. <i>6 classes – exercises:</i> 3. <i>Conducting classes by students according to their plans</i> 4. <i>6 classes – exercises:</i> 5. <i>Conducting individual sessions based on the Watsu method</i>

DEPARTMENT : DIETETICS

The list of subjects for ERASMUS+ incoming students

FIELD OF STUDY: DIETETICS
LIST OF SUBJECTS FOR 2026/2027

No.	SUBJECT	HOURS/ ECTS	Form of passing
Winter semester			
02-DT-1-ER-07	Basics of Dietetics (Podstawy Dietetyki)	15/4	Exam/raports
01-WF-1-ER-15	Clinical Nutrition (Żywnienie Kliniczne)	20/5	Exam/raports
02-DT-1-ER-01	Sports Dietetics and Supplementation (Dietetyka Sportowa i Suplementacja)	20/5	Exam
02-DT-1-ER-11	Histology of the Digestive System (Histologia Układu Pokarmowego)	15/4	Pass
01-WF-1-ER-08	Nutrition in the Life Cycle (Żywnienie w Różnych Okresach Życia)	20/5	Exam/raports
01-T-1-ER-11	Allowed and Prohibited Methods of Performance Support In Sport (Dozwolone i Zabronione Metody Wspomagania Wysiłku w Sporcie)	20/5	Exam/raports
01-T-1-ER-12	Immunodietetics (Immunodietetyka)	20/5	Exam/raports
Summer semester			
02-DT-1-ER-10	Food and Waterborne Parasitology (Parazytologia w Żywieniu)	15/4	Pass
01-WF-1-ER-16	Nutrition in Extreme Sports, Qualified Tourism and Different Climatic Conditions (Żywnienie w Sportach Ekstremalnych, Turystyce Kwalifikowanej i Różnych Warunkach Klimatycznych)	20/5	Exam/raports
01-WF-1-ER-17	Methodological and Ethical Aspects of Conducting Human Studies (Metodologiczne i Etyczne Zagadnienia w Badaniach z Udziałem Ludzi)	10/2	Project
01-WF-1-ER-19	Nutritional Support for Fertility and Reproductive Health (Żywieniowe Wspomaganie Płodności i Zdrowia Prokreacyjnego)	15/4	Exam/raports
Hybrid Exchange Module – / English-friendly course - classes for incoming students integrated with local students/			
	Physiotherapy in the practice of a dietician (Fizjoterapia w praktyce dietetyka)	20/5	Oral exam

Subject	PODSTAWY DIETETYKI
	BASICS OF DIETETICS
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Paulina Nowaczyk, PhD
ECTS points	4
Number of hours	15
Assessment methods	Exam/raports
Learning Outcomes	<p><i>This course provides students with a basic knowledge and practical skills in diet planning for health prophylaxis in various population groups, as well as basics in nutritional support and treatment of selected health conditions.</i></p> <p><i>The aims of the course are:</i></p> <p><i>familiarizing students with the basic rules of estimating energy-, macronutrients-, vitamins- and minerals requirements in various population groups,</i></p> <p><i>familiarizing students with the basic rules of diet planning and evaluation for various population groups,</i></p> <p><i>familiarizing students with basics of etiopathology, risk factors and nutritional treatment in selected health conditions and diseases.</i></p>
Topics of the classes	<ol style="list-style-type: none"> <i>1. Estimating energy and macronutrients needs for various population groups. Nutritional recommendations on vitamins and minerals intake in various population groups – various levels of dietary guidelines.</i> <i>2. Basic rules of diet planning and evaluation.</i> <i>3. Diet planning in prevention of diet-related diseases in various population groups.</i> <i>4. Diet planning in prevention and treatment of overweight and obesity.</i> <i>5. Diet planning in prevention and treatment carbohydrate metabolism disorders.</i> <i>6. Diet planning in prevention and treatment lipid metabolism disorders.</i>
Recommended literature	<ol style="list-style-type: none"> <i>1. Gandy J. Manual of Dietetic Practice. 6th Edition. Athenaeum Uitgeverij 2019.</i> <i>2. Webster-Gandy J., Madden A., Holdsworth M. Oxford Handbook of Nutrition and Dietetic. Oxford University Press 2020.</i> <i>3. Scientific papers publish in high-impacted journals recommended by teacher.</i>

Subject	ŻYWIENIE KLINICZNE
	CLINICAL NUTRITION
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Krzysztof Durkalec-Michalski, Ass. Prof.
ECTS points	5
Number of hours	20
Assessment methods	Exam/raports
Learning Outcomes	<p><i>This course provides students with the detailed knowledge and practical skills in the field of nutritional prophylaxis and treatment of selected health conditions and diseases.</i></p> <p><i>The aims of the course are:</i></p> <ul style="list-style-type: none"> – <i>familiarizing students with etiopathology, risk factors, treatment methods – with special emphasis of nutrition, in selected diseases,</i> – <i>gaining the ability of nutritional education and rationalization of nutrition in selected health conditions,</i> – <i>gaining the abilities of practical implementation of diet planning in selected diseases and health conditions.</i>
Topics of the classes	<ol style="list-style-type: none"> 1. <i>Nutrition and diet planning in hypertension and selected components of metabolic syndrome.</i> 2. <i>Nutrition in prophylaxis and treatment of osteoporosis and skeletal disorders.</i> 3. <i>Nutritional considerations for injury prevention and recovery.</i> 4. <i>Nutrition in selected neurological diseases - Alzheimer's disease, Parkinson's disease, multiple sclerosis, lateral sclerosis, strokes, brain aging, epilepsy.</i> 5. <i>Nutrition in selected autoimmune and inflammatory diseases - rheumatoid arthritis, psoriasis, alopecia areata.</i> 6. <i>Nutrition in prophylaxis, treatment and recovery in various types of cancer.</i>

Subject	HISTOLOGIA UKŁADU POKARMOWEGO
	HISTOLOGY OF THE DIGESTIVE SYSTEM
Unit of AWF	Department of Biology and Anatomy/Zakład Biologii i Anatomii
Teacher's name	Wojciech Jarosz, PhD
ECTS points	4
Number of hours	15
Assessment methods	Pass (The test with some multiple choice, and matching)
Learning Outcomes	<p><i>This course provides students with the detailed knowledge in the field of human histology focused on the digestive system.</i></p> <p><i>At the end of the course student will be able to:</i></p> <ol style="list-style-type: none"> <i>1. Describe the microscopic structure of human tissues –their morphological differentiation in relation to the function and location.</i> <i>2. Describe the possibility of regeneration of individual tissues.</i> <i>3. Describe the role of different types of tissues in structural and functional integrity of human body especially in relation to the role of digestive system.</i>
Topics of the classes	<ol style="list-style-type: none"> <i>1. Introduction to histology, methods used in histology.</i> <i>2. Microscopy – practical operations on light microscope.</i> <i>3. The structure, functions and regeneration of different types of epithelial tissues. Types of intercellular connections.</i> <i>4. The structure, functions and regeneration of different types of connective tissues, specific structure and role of adipose tissue.</i> <i>5. Blood and lymph: characteristic of plasma and morphological elements: number and structure of erythrocytes – the role of hemoglobin in transport of oxygen, number and structure and functions of leucocytes (lymphocytes, monocytes and granulocytes), immunological role of lymphocytes, number structure and functions thrombocytes. The role of blood and lymph.</i> <i>6. The structure, functions and regeneration smooth, striated muscle, myocardial fibre</i> <i>7. The structure, functions and regeneration of nerves tissue in different part of nervous system; reflexes – conditioned and unconditioned, bisynaptic reflex arc.</i> <i>8. Detailed histology of selected parts of digestive system.</i> <p><i>During individual work with microscope in lab students will analyze the structure of selected human tissues and organ</i></p>

Subject	DOZWOLONE I ZABRONIONE METODY WSPOMAGANIA WYSIŁKU W SPORCIE
	ALLOWED AND PROHIBITED METHODS OF ATHLETIC SUPPORT IN SPORT
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Krzysztof Durkalec-Michalski, Ass. Prof.
ECTS points	5
Number of hours	20
Assessment methods	Exam/raports
Learning Outcomes	<i>This course introduce students with international institutions involved in shaping regulations on substances and methods prohibited/allowed to use in sport, as well as provide them with an up-to-date knowledge of legitimate and safe substances/methods to support physical performance in sport:</i>
	<ol style="list-style-type: none"> 1. <i>Getting familiar with current and up-to-date lists of substances and methods prohibited in sport.</i> 2. <i>Acquiring the knowledge and practical skills of searching reliable information on substances and methods prohibited in sport.</i> 3. <i>Familiarizing with an adverse health consequences of using various types of prohibited substances and methods in sport.</i> 4. <i>Recognizing and implementation of evidence-based supplementation strategies to support athletic training and exercise performance.</i>
Topics of the classes	<ol style="list-style-type: none"> 1. <i>Substances and methods prohibited to use in sport.</i> 2. <i>Biomedical side-effects of doping in sport.</i> 3. <i>Therapeutic Use Exemptions (TUEs).</i> 4. <i>The most famous and discussed doping scandals in sport.</i> 5. <i>Allowed pharmacological and supplementation support in sport.</i>
Recommended literature	<ol style="list-style-type: none"> 1. <i>World Anti-Doping Code International Standard Prohibited List 2023 and its annual updates.</i> 2. <i>Australian Institute of Sport position statement supplements and sports foods in high performance sport August 2022 and its annual update.</i> 3. <i>Vitale K, Getzin A. Nutrition and Supplement Update for the Endurance Athlete: Review and Recommendations. Nutrients 2019, 11(6): 1289.</i> 4. <i>Maughan RJ, Burke LM, Dvorak J, et al. IOC consensus statement: dietary supplements and the high-performance athlete. Br J Sports Med. 2018, 52(7): 439-455.</i> 5. <i>Mottram D., Chester N. Drugs in Sport. Routledge 2022.</i>

Subject	IMMUNODIETETYKA
	IMMUNODIETETICS
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Krzysztof Durkalec-Michalski, Ass. Prof.
ECTS points	5
Number of hours	20
Assessment methods	Exam/raports
Learning Outcomes	<p><i>This course provides students with the theoretical foundations of the immunonutrition, including the knowledge of the impact of nutritional status, diet, and physical activity on functioning of immune system and body homeostasis.</i></p> <ol style="list-style-type: none"> <i>1. Familiarizing with the possibilities to modulate the activity and potential of the immune system through interventions with specific nutrients and non-nutritive biologically active ingredients.</i> <i>2. Understanding the impact of the alternated supply of nutrients on modifying the inflammatory or immune response of the body.</i>
Topics of the classes	<ol style="list-style-type: none"> <i>1. Nutritional status & nutrition and functioning of the immune system.</i> <i>2. 'Immunosenescence' – 'aging' of the immune system.</i> <i>3. Immunological background of obesity and metabolic syndrome.</i> <i>4. An overview of supplements possessing an immunomodulatory effect.</i> <i>5. Nutrition in the prevention and treatment of upper respiratory tract infections.</i> <i>6. Exercise immunology. Immunonutrition in sport.</i>
Recommended literature	<ol style="list-style-type: none"> <i>1. Rich R.R., Fleisher T.A., Schroeder Jr. H. W., Weyand C.M., Corry D.B., Puck J. M. Clinical Immunology. Principles and Practice. Elsevier 2022.</i> <i>2. Gleeson M., Bishop N., Walsh N. Exercise Immunology. Taylor & Francis Ltd 2013</i> <i>3. Scientific papers published in high-impacted journals recommended by teacher.Mottram D., Chester N. Drugs in Sport. Routledge 2022.</i>

Subject	PARAZYTOLOGIA W ŻYWIENIU
	FOOD AND WATERBORNE PARASITOLOGY
Unit of AWF	Department of Biology and Anatomy/Zakład Biologii i Anatomii
Teacher's name	Wojciech Jarosz, PhD
ECTS points	4
Number of hours	20
Assessment methods	Pass (The test with some multiple choice, and matching)
Learning Outcomes	<p><i>This course provides students with the detailed knowledge in the field of parasitology with focus on food and waterborne parasites. At the end of the course student will be able to:</i></p> <ol style="list-style-type: none"> <i>1. Describe the taxonomy, morphology, life cycle and symptomatology of water, soil and plant food transmitted parasites.</i> <i>2. Describe the taxonomy, morphology, life cycle and symptomatology of meat transmitted parasites.</i> <i>3. Describe most commonly used diagnostics procedures in parasitology.</i> <i>4. Recognize parasites on microscopic slides.</i>
Topics of the classes	<ol style="list-style-type: none"> <i>1. Introduction to Parasitology. Definition. Effects of the parasite on the host. Host reaction against the parasite.</i> <i>2. Main parasites transmitted by water, soil and plants. Relationship between fecal contamination, water and plant food. Species of parasites: Entamoeba histolytica, Giardia intestinalis, Cryptosporidium sp, Fasciola hepatica, Echinococcus sp, Enterobius vermicularis, Ascaris lumbricoides. Taxonomy. Morphology. Life cycle. Clinics. Epidemiology. Routes of contamination of food. Prevention and control..</i> <i>3. Main parasites transmitted by meat and fish. Toxoplasma gondii, Taenia sp., Trichinella spiralis, Anisakis sp. Life cycle. Clinics. Epidemiology. Routes of contamination of food. Prevention and control.</i> <i>4. Zoonoses and zoonotic parasites of public concern. Toxocara canis and Toxocara cati. Taxonomy. Morphology. Life cycle. Clinics.</i> <i>5. Diagnostics in parasitology – practice class in laboratory.</i>

Subject	ŻYWIENIE W SPORTACH EKSTREMALNYCH, TURYSTYCE KWALIFIKOWANEJ I RÓŻNYCH WARUNKACH KLIMATYCZNYCH NUTRITION IN EXTREME SPORTS, QUALIFIED TOURISM AND DIFFERENT CLIMATIC
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Krzysztof Durkalec-Michalski, Ass. Prof.
ECTS points	5
Number of hours	20
Assessment methods	Exam/raports
Learning Outcomes	<p><i>The course will provide students with knowledge about the basic concerns related to the nutrition in qualified tourism, agritourism and various climatic conditions. Active participation in the classes will:</i></p> <ol style="list-style-type: none"> <i>1. give the students understanding of health-related risks associated with various forms of tourism;</i> <i>2. provide students with theoretical background and practical abilities to implement nutritional and supplementation strategies to reduce risks connected with various types of tourism, as well as to prevent and minimize its health-adverse effects.</i>
Topics of the classes	<ol style="list-style-type: none"> <i>1. Nutrition in hiking and polar tourism.</i> <i>2. Planning nutrition in hypoxic conditions and high-mountain tourism.</i> <i>3. Nutrition in water tourism and deep-sea diving.</i> <i>4. Nutrition management in tropical climate.</i> <i>5. Analysis of culinary tourism in Poland and selected locations in the world.</i> <i>6. Nutrition management during military missions and space flights</i>
Recommended literature	<ol style="list-style-type: none"> <i>1. Oktadiana H., Rahmanita M., Suprina R., Junyang P. Current Issues in Tourism, Gastronomy, and Tourist Destination Research. Subject	METODOLOGICZNE I ETYCZNE ZAGADNIENIA W BADANIACH Z UDZIAŁEM LUDZI
	METHODOLOGICAL AND ETHICAL ASPECTS OF CONDUCTING HUMAN STUDIES
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Paulina Nowaczyk, PhD
ECTS points	2
Number of hours	10
Assessment methods	Project
Learning Outcomes	<i>This course provides students with theoretical introduction and basic practical skills in planning and conducting controlled human studies with special emphasis on dietary and supplementation studies in physically active individuals and athletes.</i>
	<p><i>The aims of the course are familiarizing students with:</i></p> <ul style="list-style-type: none"> – <i>theoretical background on planning and conducting human studies, e.g., types of study designs, rules and methods of study sample calculation and selection, tools for dietary evaluation, tools for physical capacity and performance evaluation, etc.</i> – <i>bioethical standards in conducting human studies,</i> – <i>registry databases for observational and interventional protocols.</i>
Topics of the classes	<ol style="list-style-type: none"> 1. <i>The strategy of epidemiological and interventional studies.</i> 2. <i>Methods and tools in epidemiological research. Basic principles for designing epidemiological studies.</i> 3. <i>Dietary assessment methods in epidemiological studies: strengths and limitations.</i> 4. <i>Basics in evaluation of physical capacity and performance in human studies.</i> 5. <i>Bioethical standards in conducting human studies.</i>
Recommended literature	<ol style="list-style-type: none"> 1. <i>Willet W. Nutritional Epidemiology. Oxford University Press Inc, 2012.</i> 2. <i>Thomas G. Research Methodology and Scientific Writing. Springer Nature Switzerland AG 2022.</i> 3. <i>The Declaration of Helsinki.</i> 4. <i>Oviedo Convention and its Protocols.</i> 5. <i>Scientific papers published in high-impacted journals recommended by teacher.</i>

Subject	ŻYWIENIOWE WSPOMAGANIE PŁODNOŚCI I ZDROWIA PROKREACYJNEGO
	NUTRITIONAL SUPPORT FOR FERTILITY AND REPRODUCTIVE HEALTH
Unit of AWF	Department of Sports Dietetics /Zakład Dietetyki Sportowej
Teacher's name	Paulina Nowaczyk, PhD
ECTS points	4
Number of hours	15
Assessment methods	Exam/raports
Learning Outcomes	<p><i>The aim of the course is to comprehensively familiarize students with lifestyle factors, including, above all, the role of diet, nutritional status and physical activity in shaping the reproductive health of females and males.</i></p> <p><i>Within the course students will:</i></p> <ul style="list-style-type: none"> – <i>learn about the role of nutritional deficiencies and excessive supply of energy and certain nutrients at various stages of ontogenetic development on nutritional status and health, and consequently on determination of the procreative potential of the organism,</i> – <i>get the knowledge on the role of early metabolic programming and epigenetic mechanisms on reproductive health in future years,</i> – <i>gain the practical ability to plan comprehensive nutritional and supplementation support for improvement of fertility and reproductive health for females and males during the preconception period, as well as for females during physiological pregnancy and with co-occurring diseases.</i>
	<ol style="list-style-type: none"> 1. <i>Overweight & obesity during various stages of life and their impact on reproductive health.</i> 2. <i>The influence of nutrients, non-nutritive biologically active ingredients, supplementation and physical activity on the process of spermatogenesis and oogenesis.</i> 3. <i>The role of nutrition & nutritional status in functioning of hypothalamic-pituitary-ovarian axis.</i> 4. <i>Nutritional support in endometriosis, polycystic ovarian syndrome, insulin resistance, thyroid diseases and hyperprolactinemia.</i> 5. <i>Nutrition in pregnancy. Nutritional support treatment in selected pathologies during pregnancy i.e., gestational diabetes mellitus, hypertension, constipations and persistent vomiting.</i>

Subject	FIZJOTERAPIA W PRAKTYCE DIETETYKA
	PHYSIOTHERAPY IN THE PRACTICE OF A DIETICIAN
Unit of AWF	Department of Kinesiotherapy Developmental Physiotherapy (Zakład Kinezyterapii i Fizjoterapii wieku Rozwojowego)
Teacher's name	Łukasz Michałowski, PT, PhD
ECTS points	5
Number of hours	20
Assessment methods	Methods of education: workshops, method of evaluation: practical and oral exam
Learning Outcomes	<p><i>DIERS formetric 4D is a light-optical scanning method based on Video-Raster-Stereography (VRS). Accordingly, the system consists of a light projector which projects a line grid on the back of the patient which is recorded by an imaging unit. A computer software analyzes the line curvature and generates from it – by means of the method of the Photogrammetrie – a three-dimensional model of the surface, comparable to a plaster cast. In opposition to x-ray, the DIERS formetric provides comprehensive information about the whole body statics and posture in only one measuring process, e.g. spine curvature (lateral and frontal), vertebral rotation, and pelvic position. Even muscular dysbalances can be detected based on the curvature image of the back surface.</i></p> <p><i>The Functional Movement Screen (FMS™) is an assessment technique, which attempts to identify imbalances in mobility and stability during fundamental movement patterns. This assessment tool is thought to exacerbate the individual's compensatory movement problems, allowing for easy identification. It is these movement flaws that may lead to breakdown in the kinetic linking system, causing inefficiency and microtrauma during activity. In many cases, muscle flexibility and strength imbalances along with previous injuries may not be identified. These problems, which have been acknowledged as significant risk factors for injury, will be identified using the FMS™.</i></p> <p><i>The aim of the classes is acquiring knowledge in the theory of the Kinesiotaping method</i></p> <p><i>Acquiring the ability to effectively apply the tape in specific clinical cases</i></p> <p><i>Student after classes has knowledge of the principles of using the Kinesiotaping method, including indications and contraindications</i></p> <p><i>Independently performs all types of applications learned on the classes</i></p> <p><i>Is able to select the appropriate type of application for a clinical unit.</i></p>

Topics of the classes	<ol style="list-style-type: none"> 1. <i>Diagnostics of body posture and spine, which include the use of the DIERS Formetric 4D system.</i> 2. <i>Functional Movement Screen (FMS™) - tool for analysing the stability of body segments during movement; Part of the comprehensive physiotherapeutic and biomechanical assessment of physically active persons as an element of primary prevention of sport injuries.</i> 3. <i>Physical examination and assessment in McKenzie Method and Functional Movement Screen (FMS™)</i> 4. <i>The mechanical therapy procedures; education of the patient and patient involvement in the treatment; Corrective exercise to restore movement patterns.</i> 5. <i>Proper movement and building strength on it.</i> 6. <i>Introduction to the concept of the Kinesiotaping method: history, application, properties of Kinesio tape.</i> 7. <i>The impact of Kinesio tape on the skin and superficial and deep fascia.</i> 8. <i>Tape application rules.</i> 9. <i>Tape removal methods.</i> 10. <i>Contraindications, precautions and guidelines for the use of the Kinesio Taping Method</i> <i>Sample applications using kinesio tape for muscle relaxation, muscle stimulation, analgesic, stabilizing and lymphatic</i>
Recommended literature	<ol style="list-style-type: none"> 1. <i>Movement Functional Movement Systems</i> by Gray Cook Lee Burton Kyle Kiesel Greg Rose Milo F Bryant 2. <i>Clinical Therapeutic Applications of the Kinesio Taping Method</i> by Kenzo Kase, Jim Wallis, Tsuyoshi Kase.
